**CLAIM AMENDMENTS:**

Please amend claims 1, 13 and 23 as follows. The claims currently pending read as follows:

1. (Currently Amended) A method of generating a list of target devices to be configured in communication with a server, comprising:  
creating a first list of target devices to be configured;  
identifying at least one addressed target device having an associated network address;  
modifying the first list of target devices using the addressed target device; and  
generating a modified list of target devices to be configured, wherein the target devices are to be remotely booted by the server.
2. (Original) The method of claim 1 wherein the addressed target device is listed in at least one information source.
3. (Original) The method of claim 1 further comprising:  
adding the associated network address of the addressed target device to the first list of target devices.
4. (Original) The method of claim 1 further comprising:  
adding the addressed target device having an associated network address to the first list of target devices.
5. (Original) The method of claim 1 further comprising:  
removing the addressed target device having an associated network address from the first list of target devices.

6. (Original) The method of claim 1 further comprising:  
pre-configuring at least one preconfigured target device.
7. (Original) The method of claim 6 further comprising:  
adding the preconfigured target device to the first list.
8. (Original) The method of claim 1 further comprising:  
determining if a target device has an associated network address; and  
removing the target device from the modified list of target devices if it does  
not have an associated network address.
9. (Original) The method of claim 1 further comprising:  
providing the modified list to the server.
10. (Original) The method of claim 1 further comprising:  
configuring the target devices on the modified list.
11. (Original) The method of claim 1 further comprising:  
examining packet data to determine if a target device has an associated  
network address.
12. (Original) The method of claim 1 further comprising:  
examining log data to determine if a target device has an associated network  
address.

13. (Currently Amended) Computer program product in a computer usable medium for generating a list of target devices to be configured in communication with a server, comprising:

means for creating a first list of target devices to be configured;  
means for identifying with an identification at least one addressed target device having an associated network address;  
means for modifying the first list of target devices using the addressed target device; and

means for generating a modified list of target devices to be configured,  
wherein the target devices are to be remotely booted by the server.

14. (Original) The program of claim 13 further comprising:

means for storing the identification of the addressed target device.

15. (Original) The program of claim 13 further comprising:

means for adding the associated network address of the addressed target device to the first list of target devices.

16. (Original) The program of claim 13 further comprising:

means for adding the addressed target device having an associated network address to the first list of target devices.

17. (Original) The program of claim 13 further comprising:

means for removing the addressed target device having an associated network address from the first list of target devices.

18. (Original) The program of claim 13 further comprising:

means for preconfiguring at least one target device listed in the first list.

19. (Original) The program of claim 13 further comprising:  
means for removing a target device without an associated network address  
from the modified list of target devices.
20. (Original) The program of claim 13 further comprising:  
means for configuring the target devices listed in the modified list.
21. (Original) The program of claim 13 further comprising:  
means for examining packet data to determine if a target device has an  
associated network address.
22. (Original) The program of claim 13 further comprising:  
means for examining log data to determine if a target device has an associated  
network address.
23. (Currently Amended) A data processing system comprising:  
means for creating a first list of target devices to be configured, wherein the  
target devices are to be remotely booted by the server;  
means for identifying at least one addressed target device having an associated  
network address,  
means for comparing the addressed target device to the target devices on the  
first list; and  
means for generating a modified list of target devices to be configured based  
on the addressed target device.

24. (Original) The system of claim 23, further comprising:  
means for storing information about the addressed target device.
25. (Original) The system of claim 23 further comprising:  
means for configuring at least one target device.
26. (Original) The system of claim 23 further comprising:  
means for determining if a target device has an associated network address.
